o GYTPOL Joint value proposition

<) FORESCOUT

Powering digital security & operational resilience with next-gen technology

Shared vision and purpose

Forescout and GYTPOL both provide technology and tooling in pursuit of digital security and operational resilience. More than that though, both companies are born of the belief that true security is only achievable with full asset visibility and systems capable of self-healing (auto-remediating) whenever things break from established standards.

Better together

The joint Forescout-GYTPOL offering is a direct outgrowth of the companies' shared security philosophy. In practice, the integration of these two platforms provides users **a range of capabilities entirely unmatched in the market today**.

Ultimately, it's about empowering CISOs and CTOs to quickly, easily, and meaningfully improve their security postures.

Use cases

Enhancing endpoint visibility and configuration intelligence, the combined offering delivers:

- Bullet-proof detection & correction of insecure device/system configurations
- Expanded and enriched host indexing in Forescout – improving restriction regimes, threat protection, and policy refinement
- Automated network access control , segmentation , remediation , and threat response workflows (preventing lateral movement and privilege escalation)
- Continuous real time asset compliance/ compromise assessment
- Operational impact analysis of available remediations (supporting zero-disruption remediation)
- Instant rollback of actions taken

Benefits

These new capabilities help organizations...

About Forescout

Forescout Technologies, Inc., a global cybersecurity leader, continuously identifies, protects, and helps ensure the compliance of all managed and unmanaged connected cyber assets – IT, IoT, IoMT and OT. For more than 20 years, Fortune 100 organizations and government agencies have trusted Forescout to provide vendor-agnostic, automated cybersecurity at scale.

The Forescout[®] Platform delivers comprehensive capabilities for network security, risk & exposure management, and extended detection and response. With seamless context sharing and workflow orchestration via ecosystem partners, it enables customers to more effectively manage cyber risk — mitigating threats to critical infrastructure. Forescout products directly leverage this research, which is also shared openly with vendors, agencies, and other researchers.

About GYTPOL

Founded in 2019, GYTPOL is a first-of-its-kind solution provider focused on the configuration side of endpoint security. Predicated on principles of automation and prevention, GYTPOL continuously monitors your devices & systems, detecting unpatched vulnerabilities and insecure configurations. The platform enables proactive, non-disruptive remediation (or reversion) at the push of a button – ensuring safe and strict policy adherence that bolsters business resilience & continuity.

With GYTPOL, it's easy to bring any device or group in line with the standards of your choosing (e.g. CIS, NIST, etc.). GYTPOL helps organizations create and enforce golden image configurations – assuring consistent and secure baselines across all devices.
