

# GYTPOL In Action

Powering Measurable Outcomes for Real Businesses

Built with ROI in mind, GYTPOL helps Operations teams better account for security risks and Security teams better account for operational risks.

The result is less friction, greater alignment, better hardened endpoints, and higher productivity.

On average, businesses spend **4%** of their total budgets on IT and **13%** of their IT budgets on cybersecurity. And still... Attacks hit **80%** of businesses, eroding up to **9%** of enterprises of annual revenues.

This is because traditional security tools don't address human error, which account for...

**90%**  
of security incidents

## GYTPOL takes a different approach

Baking the business into security and security into the business - including the all the biggest breeding grounds for human error. On average, this delivers...

**50%+**

faster mean time to repair (MTTR)

**30%+**

attack surface reduction

**25%+**

higher labor productivity

### City of Phoenix achieved...

**5,000+**

misconfigurations fixed in first days

**83%**

attack surface reduction

**480%**

increase in IT & security productivity

**77%**

faster remediation

### THE UNIVERSITY OF KANSAS HEALTH SYSTEM achieved...

**3,000**

hours saved

**2 FTE**

productivity uplift

**0 Downtime**

with 1 major outage successfully prevented
