

gytpol Validator

Validator is an endpoint threat & compliance analysis suite.

Our initial scan, finds issues in **90%** of already secured endpoints.

Within 2 months, our customers reduced threats in endpoints by **45%**.

Main Components

Endpoint Threat Analysis

- ✓ Discovers critical **configuration vulnerabilities** in endpoints
- ✓ Identifies **unprotected credentials & clear text passwords**
- ✓ Alerts **local admins, unauthorized open ports, inactive anti-virus etc** in endpoints

Compliance & Audit

- ✓ Accurate **compliance & audit** status at the endpoints
- ✓ Supports: GDPR, SOX, ISO 27001, PCI DSS, CIS, NIST, HIPAA

Policy Validation

- ✓ Identifies **Azure & OnPrem Active Directory** threats
- ✓ **Intune & Group Policy** discrepancies & vulnerabilities
- ✓ Verifies **Security Updates** are in place
- ✓ Enterprise wide unified **Security Baseline**

Endpoint Performance

- ✓ Improves Start-up and Login times. Correlates delays with hardware types

Cross Platform

- Microsoft
- Apple
- Android
- Linux

Environment

- Group Policy
- Active Directory
- Intune
- Azure & OnPrem
- Domain & Non-domain Endpoints

Operational

- Unified Dashboard
- Remediation
- SIEM Integration
- Guides & Solutions
