

## NEXT GENERATION ACTIVE DIRECTORY ASSESSMENT

**CONTINUOUS  
MONITORING**

**ENDPOINT  
VALIDATION**

**AUTO  
REMEDICATION**

**AZURE CLOUD  
MIGRATION**

### THE ULTIMATE ZERO TRUST POLICY

Microsoft Active Directory (AD) & Azure AD are the most widely deployed and the most critical platform components.

**Hackers use LATERAL MOVEMENT as a major ATTACK VECTOR to breach the Active Directory.**

**Minimizes attack surface with a Next Gen AD Security Assessment solution.**

Gytpol Validator™ – A **Next Generation AD Assessment** solution:

- Designed to tackle the **cyber risks of today**
- **Protects** organizations from cyber criminals and ransomware attacks.
- Provides the **visibility** to defend by *thinking like a hacker*

### THE GYTPOL BENEFITS

#### ELIMINATE AD BLINDSPOTS

- 24/7 monitoring of your AD/AAD and all devices.
- Immediate alerting of threats
- Remediates automatically on all endpoints & servers.

#### SINGLE POINT OF VISIBILITY & CONTROL

- One console provides central visibility & SIEM supported.
- Lets you know what is really happening.
- Even for remote endpoints which are not connected to the network.

#### BASELINE FOR COMPLIANCE & IMPROVEMENTS

- Optimizes and improves risk posture.
- Benchmark and improve targets.
