

BOOST SECURITY WITH ZERO TRUST POLICY

CREDENTIAL THEFT

LATERAL MOVEMENT

OVERTAKE ACCOUNTS

EXPLOIT REMOTE ACCESS

SEIZE DOMAIN CONTROLLERS

NEXT LEVEL BREACH PREVENTION

Gytpol Validator's unique **Configuration Analysis Algorithms** delivers continuous real-time security posture assessments across all endpoints regardless of the location, network or user.

Zero Trust Policy also for your on-premises infrastructure & cloud services will keep your organization running smoothly.

Trust your endpoint devices with compliance validation before allowing network access.

Reliable Smart & Intelligent Remediation.

THINK LIKE A HACKER

We make the invisible, visible.

THE GYTPOL BENEFITS

ELIMINATE AD BLINDSPOTS

- 24/7 monitoring of your AD/AAD and all devices.
- Immediate alerting of threats.
- Remediates automatically on all endpoints & servers.

SINGLE POINT OF VISIBILITY & CONTROL

- One console provides central visibility & SIEM supported.
- Lets you know what is really happening.
- Even for remote endpoints which are not connected to the network.

BASELINE FOR COMPLIANCE & IMPROVEMENTS

- Optimizes and improves risk posture.
- Benchmark and improve targets.
